Eresto DigiMenu — Brand Guidelines

Version 1.0 • Product brand within the Eresto ecosystem

01. Master Logo

Use the full-colour horizontal lockup as the primary product identity. The Eresto wordmark remains dominant; DigiMenu acts as the product descriptor.

02. Brand Relationship

DigiMenu retains the Eresto red and charcoal visual language so the product is immediately connected to the parent brand.

03. Colour Palette

Colour	HEX	Use
Eresto Red	#D32F2F	Primary accent / Menu
Charcoal Gray	#424242	Wordmark / primary text
Cool Gray	#9E9E9E	Secondary UI / text
Light Background	#F9F9F9	Surfaces

04. Typography

Primary typeface: Poppins or a similar modern geometric sans-serif. DigiMenu should remain lighter than the Eresto wordmark to preserve brand hierarchy.

05. Logo Variations

Master — full colour on light backgrounds. White version — dark backgrounds. Monochrome — single-colour technical/print applications. Icon-only — app icon and favicon use.

06. Clear Space & Minimum Size

Maintain clear space around the complete lockup. Do not crowd the logo with other marks or interface elements. For digital applications, use the icon-only version when the full lockup becomes too small.

07. Usage Rules

Do not stretch, skew, rotate, recolour, outline or add shadows to the logo. Do not alter the fork-and-spoon emblem. Keep the Eresto red consistent across product touchpoints.

08. Product Tagline

Your Menu. More Possibilities.
